Total Fire Protection

PROVIDING DESIGN AND INSTALLATION SOLUTIONS FOR EVERY APPLICATION FROM ELEMENTARY SCHOOLS TO POWER PLANTS

Systems & Special Hazard

Specializing in installation and commissioning for commercial and industrial applications, the Systems Division NICET certified designers provide an appropriate life safety and fire protection system for your specific construction requirements. Systems Division technicians routinely install, program and commission numerous new and retrofit fire alarm, fire suppression, and smoke evacuation systems.

For the industrial client seeking to quickly upgrade or establish a new facility, AFP offers affordable custom Special Hazard design solutions for your specialized needs. The Systems Division strives to lessen the onsite time requirements by prefabricating, wiring to terminal blocks, and bench testing control components, allowing for greater quality control and ease of final installation and commissioning.

FIRE PROTECTION OPTIONS

FIRE / GAS ALARM & DETECTION

- Installation
- Maintenance

FIRE SPRINKLER

- Deluge
- Dry Pipe
- Wet Pipe
- Pre-Action
- Fixed Spray
- Foam

CLEAN AGENT FIRE SUPPRESSION

- FM-200
- Argonite
- Water Mist
- Novec 1230
- Low & High Pressure CO₂

Service & Support

The Service Division provides general maintenance and technical support for existing commercial and industrial fire alarm, fire suppression systems, and portable fire extinguishers. State certified inspectors check your fire protection system on regular intervals to ensure that your building remains up-to-date and compliant with all local fire protection codes.

Available 24/7, the Service Division can attend to and fix any false alarm or general fault that should arise on your fire protection system. Should the need arise to replace a given component of the fire system, AFP stocks a variety of manufacturers to replace faulty devices and bring the system back to normal in a timely fashion, minimizing any downtime.

Fire Sprinkler

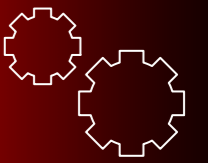

To protect your assets, the Fire Sprinkler Division provides suitable designs and installs pre-action, dry and wet pipe, deluge, and fixed spray fire sprinkler systems to meet your construction requirements. Union trained sprinkler fitters bring experience

throughout the installation process to ensure quality final results for your new installation or fire system upgrade. AFP representatives commission every installation with governing authorities to guarantee proper results and code compliance.

Fire Sprinkler-Service

The Fire Sprinkler-Service Division inspects and supports existing installations for pre-action, dry and wet pipe, deluge, and fixed spray fire sprinkler systems. State certified inspectors test your fire sprinkler system on regular intervals to maintain proper functioning of your fire sprinkler system, ensuring life safety and property protection.

Additionally, the Fire Sprinkler-Service Division inspectors ensure that your building remains up-to-date and compliant with all local fire protection codes. Should the need arise, AFP can update your existing system in a timely fashion to conform to all local codes.

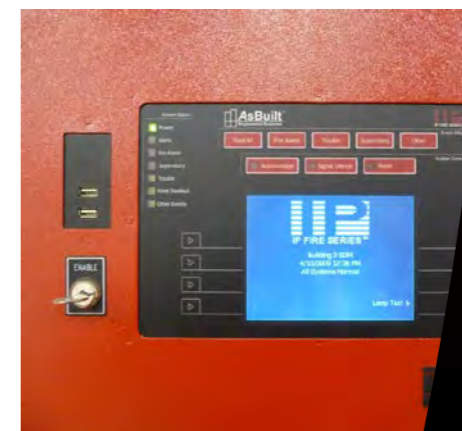

CUSTOM SOLUTIONS

No construction project is identical. Similarly designed buildings must still adhere to varying local codes and standards. For this reason, AFP provides custom design solutions for every construction type, adhering to all local codes. Prior to installation, all designs are submitted to appropriate code enforcement officials for approval.

DETECTION PRODUCTS

- Smoke Sensors
 - Photoelectric
 - Ionization
 - Early Warning
 - Video Smoke
- Thermal Sensors
- Optical Flame Detectors
- Gas Detection
 - Combustible Gas
 - Toxic / Noxious Gas

DISTRIBUTOR LIST

FIRE SUPPRESSION

- AFEX Fire Suppression Systems (Off Road)
- Badger Fire Protection
- Chemetron Fire Systems
- CHEMGUARD, Inc.
- Marioff "HI-FOG" High Pressure Water Mist
- National Foam
- PyroChem Fire Suppression
- TOMCO₂ Fire Systems

FIRE / GAS ALARM & DETECTION SYSTEMS

- Allestec Corp. (OnGuard)
- AsBuilt ES IP Fire Series
- Cooper-Wheelock (MEDC)
- Detector Electronics Corp. (Det-Tronics)
- Federal Signal / Commercial Products Group
- MSA
- Scott Health & Safety
- SPECTREX, Inc.

LINEAR FIRE DETECTION

- Protectowire
- Fenwal Alarmline

EARLY WARNING DETECTION

- VESDA LaserPlus
- CLASS II
- Stratos
- VIEW Laser Detectors
- Hansentek Spark Detection Systems
- Delta-Pac Temperature Differential Systems

MONITORING & NETWORK SYSTEMS

- AsBuilt ES IP Fire Series (iView)
- CADgraphics
- Digitize, Inc.
- Digitize-AES RadioLink
- Gemcom, Inc.
- RLE Technologies

VIDEO SMOKE DETECTION

- D-Tec FireVu™
- Fike® SigniFire™
